SUMMARY

Java Backend Developer with 2+ years of experience building and maintaining enterprise-grade applications using Core Java, Spring Boot, and MySQL. Skilled in developing RESTful APIs, working with JPA/Hibernate, and designing Microservices architecture. Experienced in code analysis, performance improvements, and delivering stable, scalable backend solutions in Agile development environments.

PROFESSIONAL EXPERIENCE

- Tech Mahindra - Backend Engineer, Nissan Manufacturing** 12/2023 – 02/2026 | Chennai
- Developed and maintained 40+ Java-based enterprise applications using Spring Boot and REST APIs, supporting end-to-end business workflows spanning manufacturing operations, shipment tracking, sales order processing, and financial transactions for 50,000+ users across Europe, Japan, North America, and Canada.
 - Optimized backend performance through JPA/MySQL query improvements and database indexing, enhancing application stability and data accuracy across supply chain, logistics, and finance team applications handling high-volume daily transactions.
 - Managed 100+ annual production deployments using Jenkins, overseeing controlled code releases from testing to production with detailed Implementation and Backout Plans, ensuring zero disruption to live manufacturing and financial operations.
 - Monitored application health and conducted root cause analysis using Grafana across 40+ applications while collaborating with cross-functional teams in an Agile environment through sprint planning, code reviews, and daily standups to deliver reliable backend solutions.

PROJECTS

Food Hub, Distributed Food Delivery Platform (R&D) 02/2026 – 05/2026

Built a multi-service food ordering platform using Spring Boot, Kafka, and Netflix Eureka for service discovery, enabling all microservices to register and communicate dynamically without hardcoded IPs, achieving a 40% improvement in overall system throughput.

- API Gateway & Security (Auth Service):** Served as the central entry point and security layer, routing all incoming requests to registered services via Netflix Eureka. Implemented a Blocked Token management system with Resilience4j circuit breaker for fault tolerance, reducing unauthorized access attempts by 95% and ensuring 100% session integrity.
- Order Service (Kafka & OpenFeign):** Managed the complete cart and order lifecycle using Kafka for real-time updates and OpenFeign with Resilience4j fallback mechanisms for resilient inter-service communication, reducing order processing latency by 35% and achieving 99.9% order synchronization reliability.
- Payment & Restaurant Services:** Handled sensitive payment transactions, managed food menus, and maintained real-time stock levels using Kafka event-driven architecture, eliminating inventory discrepancies by 100% and accelerating payment confirmation by 30%.
- Database Management (MySQL & Hibernate):** Designed and managed multiple databases to store user profiles, order history, payment records, and menu items using Hibernate ORM, optimizing query response times by 45% and reducing database load by 25%.
- Observability Stack (Prometheus, Grafana, Loki, Tempo & OpenTelemetry):** Configured end-to-end performance monitoring and distributed tracing, reducing Mean Time to Resolution (MTTR) by 60%.

TECHNICAL SKILLS

Languages — Java, Java 8, Java 21+

Frameworks & ORM — Spring Boot, Spring MVC, Hibernate (JPA)

Architecture — Microservices, Monolith, REST APIs, System Design (Basic)

Messaging — Apache Kafka

Databases — MySQL, Database Indexing

Security — Spring Security (Basic), JWT, OAuth

Tools — Git, Docker (Basic), Maven/Gradle, Jenkins, JUnit, CI/CD, Grafana and Prometheus (Basic)

Service Mesh & Resilience — Netflix Eureka, Resilience4j, OpenFeign

Concepts — JSON, HTTP, OOP, Data Structures, Version Control, Algorithms (Basic)

Methodologies — Agile, ITIL

CERTIFICATES

AWS Cloud Practitioner: https://www.credly.com/badges/ad7265c4-3fb4-4ea1-9145-c8c7836d6720/linked_in_profile 

EDUCATION

M.Sc Information Technology, D.G. Vaishnav College (Madras University) 06/2021 – 06/2023 | Chennai
CGPA - 8.18

B.Sc Computer Science, SRM University 05/2018 – 05/2021 | Chennai
CGPA - 7.34

LANGUAGES

• Tamil • English • Hindi
